

Pry-Axe Paratech force tool with cutting claw

Product features:

Length: 64 cm

Reference: 31360

EAN13: -

Distributed by **MMF Protection et Sécurité** the **Paratech Pry-Axe & Cut Claw** is a versatile **force and penetration tool** designed to meet the requirements of **firefighters** and emergency rescue teams.

It combines several essential functions for forced entry: metal cutter, standard claw, axe blade and **crowbar function**. Its compact design allows easy handling in confined environments, while its extendable head offers optimum leverage for clearance, ventilation or extraction.

Made from high-strength alloy steel with nickel-plated finish, this tool ensures robustness and durability in extreme conditions. Its **non-slip handle** ensures a secure grip, even when wearing gloves, for total control when working.

Technical specifications

- Length: 46.7 cm closed / 64 cm open
- Weight: 4.4 kg
- Material: high-strength alloy steel, nickel-plated finish
- Integrated tools: metal-cutting claw, axe blade, crowbar
- Handle: non-slip molded rubber
- Use: forced entry, cutting, levering, extraction, rescue

Areas of use

Specially adapted to **fire-fighting operations**, this tool is used to force doors, cut metal structures, quickly ventilate confined areas or free trapped victims. It is also useful for road rescue services, civil protection and specialized intervention teams.
