

## Semi-rigid 19-litre pump bucket with brass hand pump

### Product features:

Reference: 32935

EAN13: -

Distributed by **MMF Protection et Sécurité** this **19-liter semi-rigid portable tank** is designed for fire-fighting operations in mobile or isolated environments. Its **rotomolded, UV-treated polyethylene** design guarantees excellent resistance to outdoor conditions, while remaining lightweight and easy to transport.

The **brass hand pump** is mounted on a swivel flange, enabling it to be used on the left or right, depending on the configuration of the intervention. It is coupled to a **flexible hose with tap**, for controlled distribution of water or any other liquid used in the field.

The **watertight cap** with **one-way valve** prevents leaks during transport or filling. Thanks to its wide opening with integrated filter, the reservoir fills up quickly, without any risk of contamination.

### Technical specifications

- Capacity: 19 liters (5 US gallons)
- Material: semi-rigid, UV-resistant polyethylene
- Pump: brass hand pump, left/right swivel
- Weight: approx. 2.9 kg
- Cap: watertight with one-way valve
- Accessories: flexible hose with tap, carrying handle
- Presentation: complete tank ready for use

## Fields of application

This tank is ideally suited to the needs of **fire-fighters**, forestry personnel, technical services and first-response brigades. It can be used for targeted watering, to moisten sensitive areas, or as a **mobile watering solution** for sites that are difficult to access.
