

## Riche firefighter backfill rake

### Field tool for wildland fires

The "**Sapeur-Pompier**" model backfill rake, also known as the **Riche rake**, is designed for forest, brush or edge fire-fighting operations. In particular, it is used to create firebreaks, stir up embers or safely remove debris.

Tried and tested by forestry brigades and wildfire intervention units, it combines efficiency, grip and durability.

### Robust, ergonomic design

This model features **4 sharp, hardened steel tines**, ideal for snagging roots, vegetation or embers that are still active. The **130 cm long wooden handle** ensures good leverage and allows you to work for longer periods while maintaining a comfortable posture.

Its simple, yet ultra-functional design makes it perfectly suited to forestry or agricultural environments.

### Technical specifications

#### Product details

Type	Firefighter backfill rake (Riche model)
Tines	4 pointed tines - hardened steel
Handle	Hardwood - length 130 cm
Usage	Clearing, fire trenches, edge extinguishing
Grip	Long handle, two-handed operation
Weight	Suitable for prolonged use

## Fields of application

Indispensable hand tool for **firefighters specialized in forest fires**, DFCI, **technical services** or **forestry agents**. It can be used effectively for prescribed burning operations, firebreak maintenance, or to extinguish residual fires.

## Benefits

- Solid structure for intensive outdoor use
- Steel tines resist wear and high temperatures
- Good grip thanks to long handle
- Simple, lightweight and low-maintenance
