Round-eyed pickaxe with 90 cm wooden handle

Force and penetration tool for emergency rescue

This 2.5 kg round-eyed pickaxe is used by **fire-fighters** and rescue units for technical interventions, rescues and obstacle clearance. Thanks to its double head, it can be used to **dig, break, cut or scrape** quickly in rough or collapsed environments.

Its sturdiness, rapid handling and efficiency in extreme conditions make it the tool of choice for post-fire clearance, access clearance or interventions in natural or urban environments.

Technical specifications
