

Pick and hook sailor gaff without sleeve

A tactical tool for firefighters and rescue workers

This **pike pole with pick and hook** is specially designed for fire-fighting teams who need to manipulate or drop dangerous elements at height. It is used to secure high-risk areas (attics, ceilings, ducts, inaccessible zones), in the event of fire, partial collapse or reconnaissance in an unstable environment.

Thanks to its head equipped with a **pointed pick** and **curved hook**, it can be used to **drill, hook, pull, unhook or drop** materials such as :

- Thermal or acoustic insulation
- Gypsum board
- Wood or metal lathing
- False ceiling tiles
- Light piping, sheathing or wiring

Technical features

- Steel head with anti-corrosion finish
- Double tool: front pick + side hook
- Non-slip handle for better grip
- Moisture-, shock- and heat-resistant

Applications

Ideal for recognition, opening and securing

The pike pole is used by **firefighters**, emergency services and technical personnel to :

- Check the condition of a high structure or ceiling
- Bring down unbalanced materials
- Clear unstable or dangerous areas
- Check for residual fires behind false ceilings
- Water and marine rescue

Supplied without handle - available [here](#)
