

## Wooden handle for sailor gaff

### A long, sturdy handle for a professional gaff

This **wooden handle for marine gaffs** is designed for use in ports, harbours and inland waterways. Its hardwood construction ensures excellent strength and handling, even in wet environments.

Supplied in two parts of 2 meters each, it can reach up to 4 meters when assembled, offering extended reach for retrieving, guiding boats, or remote maneuvering.

### Simple, secure assembly

Screw assembly guarantees stable, fast and reliable attachment between the two sections. The screw system prevents any play between the components, ensuring user safety and precision. This handle is compatible with standard sailor's pike pole heads, which can be fixed by press-fitting and screwing.

### Technical specifications

<b>Total assembled length</b>	4 meters (2 x 2 m)
<b>Material</b>	Natural hardwood, treated
<b>Assembly</b>	With screws (supplied)
<b>Compatibility</b>	Screw-on boat hook heads
<b>Use</b>	Maneuvering, recovery, river or port safety

### Applications

Ideal for river safety services, harbors, nautical brigades, rescue boats, or mooring and berthing operations. Also suitable for nautical training centers or on-board safety equipment.

### Benefits

- Extended reach of up to 4 meters
- Removable handle for easy transport and storage
- Reliable, play-free screw attachment
- Hardwood for durability and comfortable grip
- Compatible with many gaff heads
