XPR-5592GCX LED rechargeable floodlight - ATEX Zone 0 and Explosion Proof certified

Available from **MMF Protection et Sécurité**, the **XPR-5592GCX rechargeable LED** floodlight is the ideal tool for **safe, effective area lighting**, specially designed for hazardous environments. With **ATEX Zone 0** certification, it guarantees **explosion-proof** operation in compliance with the most stringent industrial safety standards.

Key features for professional lighting

- **ATEX Zone 0 certification:** ideal for explosive and hazardous environments, guaranteeing maximum safety.
- **Explosion-proof technology:** Designed to operate in high-risk conditions, perfect for the oil, gas and chemical industries.
- **Powerful area lighting:** Brightness of **1,200 lumens** in high mode and **650 lumens** in low mode, for up to **12 hours** of runtime.
- **Rechargeable and portable:** Built-in lithium-ion battery for extended cordless use and easy recharging with included AC/DC power supplies.
- **Extreme resistance:** **IP-67** certified, waterproof, resistant to dust, heat and chemicals.

A complete solution for your area lighting needs

At **MMF Protection & Security**, we offer a ready-to-use **XPR-5592GCX rechargeable lighting kit**, including:

- **6-foot tripod with Camlock adjusters:** Ensures stable positioning for optimum lighting.
- **Powerful magnetic base:** Allows hands-free lighting with **360°** rotation.
- **Sturdy carrying case:** Protects equipment and facilitates transport to job sites.
