

## 3100 Wh energy case for site lighting

### Power supply portable for sensitive missions

This **power pack portable 220V - 3,100 Wh** provides reliable continuous AC power, perfectly suited to the needs of civil protection professionals, emergency services, technicians, or nomadic users. Compact and silent, it is easy to transport and operates without fuel, gas or noise emissions.

Equipped with a 2,000 W pure sine wave inverter (4,000 W peak), it can power sensitive devices such as medical equipment, radios, computers, power tools or field communication devices.

### High capacity and silent operation

With its 3,100 Wh capacity, this station offers extended autonomy for continuous electrical equipment. It is ideally suited to indoor or confined environments where thermal generators are not permitted.

It can be recharged via 220V mains, solar panel or cigarette-lighter socket, depending on the environment and duration of use.

### Technical data

#### Main data

Capacity	3,100 Wh
AC output	220V - 50 Hz - Pure sine
Rated power	2,000 W (peak 4,000 W)
Output ports	AC 220V, USB, 12V DC
Charging	Mains, solar or cigarette lighter
Display	Multifunction LCD display
Weight	? 25 kg
Dimensions	? 500 × 300 × 250 mm

### Recommended applications

**Ideal for professional and emergency use**

- Powering portable electric tools in areas without a mains supply
- [Lighting balloon](#)
- Support for emergency medical equipment
- Mobile radio or computer networks
- Isolated sites, bivouacs, exclusion zones
- Advanced command and rescue posts

## Benefits

### Reliability, autonomy and safety

- Stable power supply thanks to pure sine wave inverter technology
- Quiet, fuel-free operation
- Multi-source charging: mains, solar or vehicle
- Zero emissions - can be used indoors
- Real-time display of charge status and data
