

Angled lamp PELI™ 3410PL photoluminescent

Light performance and ergonomics

The 3410M torch combines two LEDs (spot + flood) for versatile lighting: concentrated beam for distance and wide beam for proximity. Three adjustable intensity levels (high, medium, low) provide up to 653 lumens in high mode for 5 h of runtime, 97 lumens for 19 h, and 25 lumens for 61 h

The 90° articulated head makes it easy to direct the light without changing position. The body is photoluminescent, enabling rapid localization even when the light is off.

Hands-free operation thanks to magnetic clip

Equipped with an integrated clip with powerful magnet, the 3410M is easily attached to a metal surface for hands-free use, practical for maintenance, mechanics, interventions or inspection

Robust construction & standard power supply

The rugged housing is made of IPX8 waterproof photoluminescent polycarbonate, ideal for harsh environments. It runs on 3 AA (LR6) batteries, easy to replace in the field.

Technical specifications

Light output	653 lm (high) / 97 lm (medium) / 25 lm (low)
Operating time	5 h / 19 h / 61 h
Beam range	184 m / 67 m / 34 m
Head	90° swivel
Clip	Integrated magnetic
Housing	Photoluminescent polycarbonate, IPX8 waterproofing
Power supply	3 AA (LR6) batteries included
Dimensions	18.9 cm
Weight	~281 g with batteries

Applications

This torch is ideal for technical teams, maintenance departments, electricians, security services, emergency and rescue workers. It provides practical, robust lighting in dark or confined areas.
