

## Rechargeable torch PELI™ 2460M with white glow stick

The **PELI™ StealthLite™ 2460M flashlight with white glow stick** is designed for demanding ground use: security, intervention, beaconing, or airport areas. This **self-contained lighting device** combines **performance, robustness and technical compliance**, meeting the strictest standards.

Its **high-resistance resin body** ensures extreme durability in the face of shocks, water, chemicals and severe conditions. It is **base-rechargeable**, offering **optimum autonomy** for long-duration missions.

Designed for **gloved users**, it is easy to hold and the lighting control is accessible. A **safety strap** is included.

Thanks to its **white light stick and color filters**, the lamp can be used to **mark out areas, signal the presence of a worker** or illuminate volumes evenly. The stick is easily removable for classic or ambient use.

---

### Technical specifications

- Model: PELI™ 2460 rechargeable
- Output: 45 lumens or 100 lumens with second bulb 2414C (included)
- Autonomy: 8 hours or 4 hours with second bulb 2414C (included)
- Color: gray
- Lighting type: high-intensity LED
- Accessory included: white light stick (removable) + **color filters: blue, yellow, red, green**
- Power supply: rechargeable NimH battery (5500 cycles) with charging base
- Autonomy: long duration
- Water resistance: IPX7
- Resistance: shock, dust, corrosion
- Use: torch or beacon light

---

### Areas of use

Ideal for **security forces, firefighters, emergency response personnel** or **airport operators**, this flashlight provides **effective beaconing, safe intervention in dark or smoky environments**, and perfect **reliability in the field**.
