

Carrying strap for Peli™ RALS 9480 9490 floodlight

A reliable shoulder strap for your intervention headlamps

The [Peli™ RALS carrying strap](#) is designed to offer maximum comfort when carrying floodlights in intervention situations. It's aimed at **firefighters**, rescue, civil security or industrial maintenance teams, to easily transport their RALS 9480 or 9490 floodlight in the field.

Thanks to its sturdy, adjustable design, this strap ensures even distribution of the headlamp's weight, limiting fatigue while ensuring safe carrying when traveling in difficult areas.

Comfort and safety for field missions

The shoulder strap is padded for extra comfort, even when worn for long periods. Secure buckles for quick, reliable attachment to the headlamp. Ideal for use in tunnels, underground parking lots, disaster zones or in the open air, this strap lets you keep your hands free while keeping your mobile lighting within immediate reach.

Technical specifications
