

Ball joint for RALS Peli™ 9455 Atex Zone 0 head

Spare part for Peli™ 9455 Atex headlamp - robust and precise

The **Peli™ RALS 9455 head swivel** is an essential spare part to ensure the smooth operation and longevity of your intervention headlamp. Designed for the **Atex Zone 0-certified RALS 9455 headlamp**, this swivel head enables precise adjustment of the light projection angle during missions in hazardous or confined environments.

Thanks to its robust, shock-resistant construction, this swivel guarantees stable, durable attachment of the LED head to its bracket. It is designed to withstand intensive handling in industrial, petrochemical or explosive atmosphere environments, where Atex equipment is required. The part features secure screwing points and a smooth rotation system for rapid adjustment of lighting direction in the field.
