

Transport bag for skein fire hose

Professional hose skein deployment bag

This **fire hose transport bag** is specially designed for **forest fire** fighting operations. It allows you to carry, store and deploy hoses in skeins while moving forward in the field. Resistant, practical and lightweight, it optimizes rapid intervention by **fire-fighters** in difficult environments.

Progressive hose deployment as you advance

Thanks to its specific design, lined with cotton and synthetic fibers, the hose deploys automatically as the wearer advances. This system ensures smooth unfolding, avoiding knots or blockages, while maintaining a sustained rate of operation.

Technical specifications

- Capacity: 4 lengths (122 m / 400') in cotton/synthetic or 5 lengths (152 m / 500') in synthetic
- Compatible diameter: 38 mm (1½")
- Weight: 1.71 kg
- Dimensions: 61 x 48 x 25 cm
- Material: mildew-resistant fabric

Recommended use

This bag is ideal for **wildfires, forests and rural areas**. It enables firefighters to carry their hose in complete safety, while ensuring rapid unfurling on uneven or rough terrain.

Distributed by **MMF Protection et Sécurité** a specialist in fire-fighting equipment, this skein bag is a reliable tool

for long-distance missions and difficult-to-access areas.
