

## JET 100 EX high-pressure motor pump - Capacity 28.8 m<sup>3</sup>/h

### The JET 100 EX motor-driven pump: the ideal solution for watering, drainage and irrigation

The **JET 100 EX motor-driven pump** is designed to meet the needs of professionals in the agricultural, construction and public works sectors. Thanks to its **WORMS EX27 4-stroke petrol engine** and its ability to generate a pressure of **9.5 bar**, it is perfectly suited to applications requiring high flow rates and constant pressure.

### JET 100 EX technical specifications

- **Pump type:** Self-priming
- **Maximum flow rate:** 28.8 m<sup>3</sup>/h (480 L/min)
- **Pressure:** 9.5 bar
- **Accepted particle size:** 2.5 mm
- **Maximum suction lift:** 7 m
- **Total head:** 95 m
- **Connections:** suction 2" - discharge 1", 1", 1.5
- **Tank capacity:** 5.6 L - Autonomy: 2 h 45
- **Net weight:** 42 kg
- **Dimensions:** 610 x 425 x 565 mm

### Standard equipment

- 4-stroke OHC petrol engine
- Starter motor
- Electronic low-oil cut-out
- Carbon ceramic mechanical seal
- Strainer, fittings and clamps included
- 3-way outlet

### Available options

- Wheelbarrow kit for easy transport
- Fittings and handheld nozzle with shut-off valve
- Suction and discharge hoses (5 m + 20 m)
- Maintenance kit (on request)

## **A motor-driven pump made in France for demanding professionals**

Robust, high-performance and reliable, the **JET 100 EX** is a motor-driven pump made in France, designed for intensive use in demanding environments. It's a benchmark for pumping operations in agriculture, on construction sites, or for security and fire-fighting services.
