

SNCF Luccia lighting balloon kit and ENERGY 1460Wh case

Pack description

LUCCIA S balloon lighting: optimum power and coverage

The LUCCIA S balloon delivers up to **18,000 lumens** for effective illumination of up to **700 m²**. Lightweight, durable and **IP54-rated**, it's perfectly suited to outdoor use and demanding environments.

1460 Wh energy case: autonomy, power and portability

The ENERGY 1460 Wh case provides power for the LUCCIA S balloon and other appliances, with an output power of **1,500 VA continuous** and **3,000 VA peak**. Equipped with 220 V and USB sockets and a 12 V output, it offers extended autonomy without noise or pollutant emissions.

Sturdy tripod for stable installation

The supplied tripod ensures rapid, stable and height-adjustable installation, perfectly compatible with the lighting balloon.

Ballast bag included: enhanced stability on all terrains

This pack also includes a **ballast bag**, designed to reinforce the tripod's stability outdoors, particularly in windy conditions or on uneven ground. Easy to fill (with sand, gravel, etc.), it guarantees the safety of the installation while improving the equipment's long-term stability.

Technical specifications

- **Luminous flux:** 18,000 lumens (LUCCIA S)
- **Illuminated area:** up to 700 m²
- **Protection rating:** IP54
- **Power supply:** ENERGY 1460 Wh case - 1,500 VA continuous / 3,000 VA peak
- **Connections:** USB, 220 V, 12 V
- **Suitcase weight:** 13.2 kg
- **Tripod:** stable, foldable, balloon-compatible
- **Ballast bag:** supplied for extra stabilization

Advantages of the stand-alone lighting pack

- Powerful, diffused lighting, ideal for worksites and sensitive areas
- Enhanced autonomy thanks to 1460 Wh case
- **Maximum stability thanks to integrated ballast bag**
- Quick installation, no noise, no fuel
- Complete solution: balloon + tripod + ballast + energy
- Easily transportable, suitable for professionals in the construction, events and rescue sectors

Recommended applications

- Construction and public works sites
- Rescue or military operations
- Outdoor events (non-electrified areas)
- Industrial maintenance, railway infrastructures
- Isolated areas requiring autonomous lighting

Why choose this pack?

The addition of the **ballast bag** makes this pack a perfectly safe solution, even in outdoor conditions. Combined with the LUCCIA S balloon and the ENERGY 1460 Wh case, it offers powerful, autonomous, stable and immediately operational lighting for all professionals looking for a reliable, long-lasting solution.
