

Manikin rescue Randy release - 25 kg or 48 kg

Manikin rescue Randy release - 25 kg or 48 kg

Manikin for realistic rescue and firefighting training

The **manikin Rescue Randy** is designed for training in victim extrication and transport. Robust, articulated and realistically weighted, it can be used to simulate a variety of intervention scenarios without risk to a real operator.

Available in two lightweight models: **25 kg** and **48 kg**, this manikin enables rescue teams and firefighters to train under realistic conditions, while guaranteeing safety and maneuverability.

Robust, articulated design

Its internal steel structure and hard-wearing vinyl coating ensure a long service life, even under heavy use. The joints are mobile and reinforced, enabling natural handling (carrying, extraction, lifting, transport).

Technical specifications

- Weights available: 25 kg or 48 kg

- Material: vinyl coating, steel frame
- Movable joints, high-strength cables
- Realistic mass distribution
- Use: training, clearing, extraction

Areas of use

This manikin is suitable for **firefighters, rescue services and trainers** for victim rescue training in a variety of contexts: confined spaces, vehicles, disaster-stricken buildings, smoke-filled areas. It is particularly useful for extrication or rapid evacuation exercises.
