

Manikin Adult CPR with airway management

Manikin professional anatomic for CPR and intubation

Distributed by **MMF Protection et Sécurité** this **manikin trunk** is designed for advanced training in adult cardiopulmonary resuscitation (CPR) and airway opening. It enables realistic practice of ventilation, intubation and nasogastric tube placement.

Complete anatomy for realistic simulation

The manikin includes detailed anatomical landmarks: sternum, ribcage, substernal incisure, as well as internal structures (teeth, larynx, trachea, inflatable lungs and stomach). It allows manual suction and ventilation with balloon (BVM), with visible thoracic lift.

Technical features

- Use: CPR and intubation training
- Oral and nasal intubation (accepting Combitube®, LMA, iGel...)
- Nasogastric tube placement and suctioning
- Dimensions: 76 x 43 x 25 cm - Weight: ? 9 kg
- Carrying bag included

Areas of use

The **manikin adult trunk** is designed for first aid trainers, firefighters, rescue services and healthcare facilities. It is perfect for practical exercises in CPR simulation, advanced airway management and pre-hospital intervention.

Distributed by MMF Protection et Sécurité

A professional reference product, this manikin is distributed by **MMF Protection et Sécurité** a specialist in equipment for medical training and emergency rescue.
