

## CPR Trainer Kit - Complete pack for adults, children and infants

### Essential teaching pack for life-saving training

Distributed by **MMF Protection et Sécurité** this **CPR trainer kit** is specifically designed to teach **lifesaving techniques**, in particular **cardiopulmonary resuscitation (CPR)**, to adults, children and infants. It is aimed at professional trainers, emergency services, training centers and any organization wishing to provide effective training in the management of cardiac arrest.

#### Trainer kit contents

- 2 manikins adult trunk CPR
- 1 manikin whole-body infant CPR
- 1 manikin whole-body infant CPR
- 10 hygienic mouthpieces per manikin
- 24 disposable breathing systems per manikin
- 100 disposable latex-free face protectors
- Transport bags for each manikin

### Training in cardiopulmonary resuscitation: a vital challenge

This pack is designed to provide **effective training in CPR**, an essential procedure in the event of cardiac arrest. The ability to perform chest compression and ventilation on realistic manikins patients of all ages is essential if every learner is to **react quickly and save lives**.

Thanks to its disposable accessories, the kit enables **hygienic and continuous training**, without interruption or cleaning between students. Suitable for group sessions, public demonstrations or certification training.

### Recommended use

Perfect for first-aid schools, local authorities, fire departments, health establishments, associations or companies

involved in **first-aid awareness** training. This trainer pack makes it easy to pass on vital skills.
