Manikin adult CPR training Brad trunk with control console

Manikin ideal for learning CPR

Distributed by **MMF Protection et Sécurité**the **manikin adult electronic Brad Compact CPR** enables realistic training in CPR gestures, thanks to an electronic system that correctly indicates hand position, depth of compressions and volume of insufflations via light signals.

Ergonomic design for professional gestures

With its elongated torso, manikin makes it easy to learn abdominal thrusts and adult CPR techniques. Its head-chin inclination respects the opening of the airways, a useful simulation in case of obstruction or shock situations. It includes three hygienic, disposable mouthpieces and breathing systems, eliminating the need for internal cleaning between sessions:contentReference[oaicite:1]{index=1} .

Technical specifications

- Electronic visual feedback: grip, depth, ventilation
- Realistic head/chin inclination to open the airway
- 3 mouth/nosepieces and 3 disposable breathing systems included
- Supplied with nylon carrying bag and knee mat
- 3-year warranty
- Latex-free

Vital lifesaving training

This manikin electronic device is specially designed for instructors wishing to teach life-saving techniques such as CPR. Thanks to the immediate feedback provided by the electronic console, learners can correct their gestures in real time and acquire solid, effective life-saving practice.

Recommended applications

Perfect for first aid schools, training centers, emergency services and vocational training. Useful for certification

and public awareness sessions.
