

100 lungs for manikin dog CPR Casper

Essential accessories for canine CPR training

This pack of 100 spare lungs is designed to equip the manikin Casper CPR trainer used in educational sessions, particularly to teach cardiopulmonary resuscitation to rescue teams. It guarantees realistic and hygienic sessions, essential for learning lifesaving gestures.

Guaranteed hygiene and educational support

Each unit in this disposable pack prevents cross-contamination between learners. Inflating and deflating the lungs faithfully simulates canine respiratory movements, making the learning experience immersive and realistic. This pack is sold in large quantities to cover many training sessions.

Technical specifications

- Quantity: 100 disposable lungs
