Replacement breastplate for manikin adult RCP Brad

Essential replacement for manikins adult CPR

MMF Protection et Sécurité offers this replacement chestplate to ensure continuity of CPR training with the popular adult manikins models Brad and Paul.

The torso plate is designed to provide a realistic feel for compressions, enhancing the lifesaving learning experience. Easy to fit, it integrates under the skin of manikin in just a few minutes, reducing downtime during training sessions.

Durability and rapid installation

Made from robust materials, this piece withstands repeated compression and intensive use. It is easy to install or replace, without the need for special tools, enabling manikins to be quickly put back into service in training centers or for regular professional use.

Technical specifications

- Compatibility: manikins trunk Brad and Paul (adults)
- Reference: standard plate model for intensive use
- Material: reinforced engineering plastic for durability
- Installation: quick replacement, access under the skin of the patient manikin
- Use: realistic chest compression training

Why add this part to your equipment?

The torso plate is a key component in maintaining an **optimum level of realism during CPR**, especially for trainers who run back-to-back sessions. By replacing this worn-out part, you ensure a consistent sense of recoil and resistance during compressions, essential for effective lifesaving training.
