

## 24 lung airways for manikin adult CPR Brad

### Compatible breathing systems for manikin Brad & Paul

Distributed by **MMF Protection et Sécurité**, these **lung/airway systems** are designed for manikins Brad™ and Paul™, offering rapid replacement between learners to maintain the hygiene and functionality of CPR sessions.

Each part simulates a realistic respiratory function allowing visible chest lift during each ventilation. Installation is simple, ensuring rapid changeover for continuous training without complex disinfection.

### Designed for intensive, hygienic training

The 24-unit pack is ideal for training centers, first aid schools and response teams wishing to offer educational sessions without compromising on hygiene or training quality.

### Technical specifications

- Quantity: 24 lung systems with airway
- Compatibility: manikins Brad™ and Paul™
- Function: simulation of thoracic expansion with each insufflation
- Material: disposable components, durable and resistant to intensive teaching use
- Packed weight: approx. 1.8 kg for 24 units

### Recommended use

This pack is perfect for CPR trainers, life-saving teaching centers, rescue services and first-aid schools. Disposable systems prevent cross-contamination, ensure optimal operation of manikins and promote smooth sessions.

### Distributed by MMF Protection et Sécurité
