Emergency safety whistle - professional model

An essential sound signal for field operations

This professional emergency whistle is recommended for water sports, rescue operations or any environment requiring a reliable audible alert. Its pealess design guarantees optimal operation even when wet or frozen, making it indispensable for rescue teams and outdoor operations.

Reliability and robustness in extreme conditions

Made from ABS plastic, it won't stick to your lips in cold weather. Featuring a dual chamber generating multiple tones, it has a lockable safety clip and a textured texture for a stable grip, even when wearing gloves.

Technical specifications

- Type: ball-less safety whistle
- Material: cold- and water-resistant ABS plastic
- Operates even when wet or frozen
- Two chambers for multiple tones
- Lockable safety clip
- Non-slip grip even with thick gloves

Applications

Ideal for firefighters, water rescue teams, civil protection, boating and outdoor sports. Perfect for use on water, in wet conditions or slippery terrain.
