

Turntable support for case PELI™ 1450

Professional PCB support for waterproof electronics integration

Distributed by **MMF Protection et Sécurité** this **1450PF board support** transforms your **Pelicasé 1450** case into a modular technical enclosure. It allows flush mounting of customized electronic panels, while maintaining watertightness, even when the cover is open.

Reliable, complete implementation

Manufactured with a polymer gasket, this kit ensures that the electronic content remains protected from moisture. It includes the following elements: plate support, O-ring seal, ten threaded inserts and four self-drilling screws for fast, secure installation.

Technical specifications

- Model: 1450PF - turntable support
- Compatibility: Pelicasé Protector 1450 case
- Includes: platinum support, O-ring, 10 inserts, 4 self-drilling screws
- Function: allows electronic panels to be flush with each other, while preserving watertightness

Recommended applications

This PCB holder is ideal for technical teams wishing to implement robust electronic interfaces in a professional **Pelicasé case**, particularly in intervention, industrial control, transport of sensitive equipment or embedded systems.

Guaranteed by MMF Protection et Sécurité

The **1450PF board support** is available from **MMF Protection et Sécurité** a recognized player in protective equipment, technical supplies and customized solutions for professional use.
