

4-piece foam for Peli™ IM2200 case

Description

The **4-piece foam kit** makes it easy to customize the interior of your [PELI™ IM2200 Storm Case](#). Composed of pre-cut foam squares (Pick N Pluck) and a sturdy insert, it's designed to create custom padding without tools.

Kit includes :

- 1 × convoluted lid foam, approx. 5.1 cm thick
- 2 × "Pick N Pluck" foam for the base, approx. 4.4 cm thick (0.50" × 0.50" cubes)
- 1 × solid foam for base, approx. 1.6 cm thick

Specifications

- Material: Ether polyurethane foam, both soft and dense for excellent shock absorption
- Pre-cut Pick N Pluck foams for fast, precise adjustment
- Thickness stratification (convoluted, cubed, solid) for effective multi-level protection:
- Fully compatible with *iM2200 Storm Case* :

Benefits

- **Customized protection:** adapt the foam to the shape of your equipment for optimum support
- **Simple, intuitive installation:** place equipment on the case, mark contours, remove unnecessary cubes
- **Structured protection:** a combination of layers for effective support, cushioning and wedging
- **Professional reliability:** robust material, ideal for demanding use

Use

1. Place the convoluted foam in the case lid.
2. Place Pick N Pluck foam in the base, followed by solid foam.
3. Set up your equipment, mark the contours, remove the cubes to create the ideal housing.
4. Leave a gap of at least 2.5 cm between the equipment and the walls to absorb shock in the event of impact.
5. Replace the foam, place your equipment and close the case, checking for a snug fit.

Conclusion

The **PELI™ IM2200 4-piece foam** kit combines practicality, durability and customized protection. Thanks to its Pick N Pluck modular design, this kit ensures quality internal organization for professionals, photographers or adventurers wishing to transport their equipment in complete safety.
