

Xenon 2424 Peli™ bulb for Mitylite™ 2420 laser lamp

Peli MityLite™ 2420 replacement lamp bulb

Product Summary

The Peli MityLite™ 2420 Lamp Module is an essential replacement part designed exclusively for the Peli MityLite™ 2420 flashlight. This module incorporates a high-performance Xenon bulb that guarantees an exceptionally intense light beam and precise laser definition. It's the ideal solution for restoring your Peli flashlight to its original power and clarity, extending its life and maintaining optimum performance.

Detailed description

Don't be surprised by a burnt-out bulb. The Peli MityLite™ 2420 replacement lamp module lets you easily replace the bulb in your Peli torch. Designed with the quality and reliability characteristic of the Peli brand, this Xenon bulb delivers a sharp, collimated beam, perfect for illuminating remote areas with great precision.

Whether you're a safety professional, a technician, an adventurer or simply a demanding user, this replacement module is essential to ensure the continuity of your equipment. Replacement is simple and requires no complex tools, allowing you to get back to work quickly.

Technical specifications

Main specifications:

- **Product type:** Spare lamp module
- **Compatibility:** Exclusively for Peli MityLite™ 2420 torch
- **Bulb type:** High-intensity Xenon (Collimated Laser Sharp Hi-Intensity Beam)
- **Function:** Replaces used bulb and reflector
- **Manufacturer reference :** Recto 31556, Verso 31556

Key benefits

- **Optimum performance:** restores your Peli MityLite™ 2420 torch to its original performance with a powerful, focused beam.
- **High intensity :** Xenon bulb ensures superior brightness illumination, ideal for dark environments or applications requiring high clarity.
- **Easy installation:** The module is designed for quick, hassle-free replacement, as shown by the instructions on the back of the packaging.
- **Peli reliability:** Manufactured to the quality standards of Peli Products, world leader in lighting and protection solutions.
- **Economical:** Extends the life of your existing torch, avoiding the need to purchase new equipment.

Use and replacement instructions

This replacement module is designed to replace the bulb and reflector of your Peli MityLite™ 2420 torch. Simply follow the steps indicated on the back of the packaging for correct and safe installation.

Replacement steps :

1. Unscrew the lens counterclockwise.
2. Extract the used lamp module.
3. Remove bulb and spring.
4. Place new bulb in spring and insert into lamp module.
5. Reinsert lamp module into torch body.
6. Screw the lens back on to close the assembly.

Caution: Use only with 4 AA batteries, as specified by the manufacturer.
