

Xenon 7054 M9 Peli™ bulb for M9 lamp

Xenon replacement lamp for Peli™ M9

Product description

The **Peli™ 31174** Xenon Replacement Lamp is a replacement bulb designed to restore the original power of your Peli™ M9 laser spot. Made in the USA, this high-performance lamp is specially designed to deliver high light output. It is the only recommended replacement for your worn-out lamp, ensuring the smooth operation and optimum performance of your device.

Specifications

- **Product type** : Xenon replacement lamp
- **Model**: Cat. No. 7054
- **Peli Part No.**: 31174
- **Compatibility**: Exclusively for the Peli™ M9 laser spot
- **Manufacture**: Made in USA

Benefits

- **Enhanced performance** : Xenon is renowned for its ability to produce an intense, powerful light, superior to traditional bulbs, ideal for use in spot lasers.
- **Specially designed for the Peli™ M9**: The design of this bulb is optimized to maximize the light output of the Peli™ M9 flashlight, ensuring reliable, high quality illumination.
- **Easy installation**: Lamp replacement is simple, requiring only unscrewing and removing the old bulb to replace it with the new one.

Use

To replace the old lamp, follow these simple steps:

1. Unscrew the flashlight body.
2. Remove the old bulb and set it aside (it can be recycled).
3. Insert the new Peli™ xenon replacement bulb.
4. Screw the flashlight body back on tightly.

Conclusion

The xenon replacement lamp for Peli™ M9 is an indispensable accessory for maintaining the performance of your spot laser. By using this official replacement, you ensure that your flashlight continues to operate with the original power and efficiency essential for tasks requiring powerful, reliable illumination.
