

## Xenon 4303 Peli™ bulb for Nemo™ 8C lamp

### Replacement module for Pelican™ Nemo™ 8C Xenon lamp

#### Product Description

The **Xenon Lamp Replacement Module** is specially designed for the **Pelican™ Nemo™ 8C** torch. Ideal for diving, it restores and maintains **optimal underwater lighting performance**. Made in the USA, this module guarantees **quality, durability and perfect compatibility** with your dive light.

#### Technical specifications

- **Product type** : Replacement module for xenon lamp
- **Compatibility**: Pelican™ Nemo™ 8C torch
- **Technology** : Xenon, optimized for 8 C batteries
- **Manufacturing** : Made in USA

#### Key Benefits

##### High light performance

Thanks to **xenon technology**, this module provides intense white light, ideal for exploring dark underwater environments. The concentrated beam greatly enhances visibility.

##### Easy installation

Replacing the module is quick and easy: unscrew the ring, remove the old module, insert the new one and screw back in. No complex tools or technical expertise required.

##### Quality and durability

Made in the USA, this module complies with strict standards, guaranteeing **long life** and excellent resistance to

harsh conditions, including prolonged immersion.

## Instructions for use

1. Unscrew lens and remove lamp holder.
2. Follow the instructions on the label and push the lamp out of the holder using a small, blunt tool.
3. To replace reflector and lens, press until resistance is felt.
4. Screw tightly to ensure watertight seal.

**Note:** Do not disassemble the used module. Dispose of the complete module in an appropriate container.
