

2004 Peli™ Xenon bulb for the SabreLite™ 2000 torch

High-performance Xenon lamp module Peli™ SabreLite™ 2000 (Ref. 2004)

Description

The **high-performance Xenon lamp module** (part no. 2004) is specially designed for the *Peli™ SabreLite™ 2000* torch. This complete module ensures powerful lighting with a high level of brightness, ideal for professional or intensive use.

Features

- Compatibility: only with the Peli™ SabreLite™ 2000 torch
- Type: complete high-performance Xenon lamp module
- Quick and easy replacement without internal disassembly
- Power supply: runs on 3 C batteries (not included)
- Manufacture: Made in Mexico

Benefits

- **High light output** for efficient lighting in demanding conditions
- **Quick replacement** of the complete module, without complex disassembly
- **Durability** thanks to original Peli™ quality
- **Safety**: module designed to avoid risky handling

Use

1. Unscrew and remove the torch lens.

2. Extract the old lamp module.
3. Insert the new Xenon module into its housing.
4. Screw torch lens back on.
5. Switch on the lamp for high-intensity illumination.

Caution: do not attempt to disassemble the lamp module. Dispose of the used module in a special waste container.

Conclusion

The **Peli™ SabreLite™ 2000 high-performance Xenon lamp module** (ref. 2004) is the essential accessory for guaranteeing powerful, reliable lighting. Easy to install and built to last, it extends your torch's performance and ensures optimum visibility in all situations.
