Xenon 3002 Peli™ bulb for Laserflex™ 2D torch

Double Filament Xenon Lamp for Peli™ LaserFlex™ 2D

Product Description

The **double-filament xenon lamp replacement module** is designed exclusively for the **Peli™ LaserFlex™ 2D** torch. Ideal for restoring lighting power, this product ensures **optimum performance** and maximum reliability. Made in the USA, it guarantees quality, durability and compatibility with your flashlight.

Technical specifications

- **Product type:** Double-filament xenon replacement lamp
- **Compatibility:** Peli™ LaserFlex™ 2D torch only
- **Technology :** Xenon, double filament
- **Manufacturing :** Made in USA

Key Benefits

Powerful, efficient light

Dual xenon filament produces an **intense, concentrated beam of light**, ideal for maximum visibility in low-light environments. Xenon technology provides a white, highly efficient light for demanding professional and leisure applications.

Simple, safe installation

Lamp replacement is quick and easy: follow the instructions to replace the old lamp with the new module, effortlessly and safely.

Certified Peli™ quality

Made in the USA, this replacement lamp meets strict Peli™ quality standards, ensuring **reliability, long-term performance**.

Instructions for use

1. Remove the lens from the torch.
2. Pull the used lamp out by the base, without rotating it. Note the position of the three pins.
3. Align the pins on the new lamp with the corresponding holes.
4. Push the lamp into the slot until it is firmly seated, without turning it.
5. Dispose of the lamp in an appropriate container.

Warning: Do not twist the lamp when inserting or removing.
