Xenon 4003 Peli™ bulb for King Lite™ & Aqua King Lite™ lamps

Peli 4003 replacement module for Xenon King Lite™ & Aqua King Lite™ lamp - High performance

The Peli 4003 Xenon lamp replacement module is the ideal solution for restoring the performance of your Peli King Lite™ or Aqua King Lite™ flashlight. This high-quality replacement module delivers a collimated, high-intensity beam for optimum visibility. Made in the USA, it guarantees the original reliability and power of your Peli equipment.

Key features

The Peli 4003 is a high-performance Xenon lamp replacement module. It features a collimated light beam bulb, offering laser-like light intensity and precision for powerful, focused illumination.

Compatibility

This replacement module is designed exclusively for the following Peli flashlight models:

- Peli King Lite™
- Peli Aqua King Lite™

Easy installation

To replace the bulb, follow the simple steps below:

1. Unscrew the lens and reflector.

2. Remove the old bulb from its housing by pushing it down and then twisting to remove it.
3. Insert the new bulb in the same way, but in reverse.
4. Tighten the screws to replace the lens and reflector. The bulb is now ready for use.

About PELI Products

PELI Products is a world leader in the design and manufacture of advanced portable lighting systems and heavy-duty protective shells. Founded in 1976, the brand is renowned for its robust, durable and reliable products, used by professionals in the most demanding environments.

Precautions for use

The used lamp module must be disposed of in an appropriate and safe waste container. Do not dispose of it with household waste.
