

Peli™ 3704 replacement bulbs for Xenon Big ED™ 4C lamp

Peli 3704 replacement bulbs for Xenon Big ED™ 4C flashlight - High-intensity beam

Make sure you always have light with this pack of two Peli 3704 replacement bulbs, designed specifically for the Peli Big ED™ 4C flashlight. The pack includes a Xenon main bulb and a spare bulb, both offering a high-intensity light beam for optimum performance and reliability. Made in the USA, these bulbs ensure powerful illumination when you need it most.

Key features

This Peli 3704 replacement pack contains two Xenon bulbs: one for the main lamp and one for back-up. Each bulb provides a high-intensity beam of light, ensuring powerful, reliable illumination for all your activities.

Compatibility

These bulbs are designed exclusively for the **Peli Big ED™ 4C** flashlight and are not compatible with other models.

Easy installation

Replacing bulbs is a quick and easy process:

1. Unscrew your lamp's lens and reflector.
2. Remove the old bulb.
3. Insert the new bulb into its housing.

4. Screw the lens and reflector back on so that the bulb is in place and ready to use.

About PELI Products

PELI Products is a world leader in the design and manufacture of portable lighting systems and heavy-duty protective shells. Renowned for the robustness and reliability of its products, the brand has been the choice of professionals in the most demanding environments since 1976.

Precautions for use

Used bulbs must be disposed of safely and properly. Please dispose of them in a suitable waste container.

Package contents

The package contains two (2) Xenon bulbs: a main bulb and a spare bulb.
