Xenon 4203 Peli™ bulbs for Nemo™ 4C lamp

Peli 4203 Xenon Lamp Module Nemo™ 4C - High Intensity

This Peli 4203 Xenon lamp replacement module is designed to deliver peak performance. It contains two high-intensity bulbs, guaranteeing a powerful and precise **"laser spot" light beam**, ideal for demanding conditions.

Compatibility

This module is exclusively compatible with the Peli **Nemo™ 4C** flashlight. It is not designed to work with other models.

Easy installation

Replacing the module takes just a few simple steps:

1. Unscrew the lens and reflector.
2. Remove the bulb assembly by pulling it out of the battery holder. Use a small, blunt instrument to ease removal if necessary.
3. Insert the new bulb until you feel resistance.
4. Replace the lens and reflector. Tighten to create a watertight seal.

About PELI Products

PELI Products is the world's leading designer of high-quality portable lighting systems and rugged protective shells. Since 1976, the brand has been recognized for its reliable, durable products, used by professionals in some of the world's toughest environments.

Precautions for use

The used lamp module must be disposed of properly and safely. Do not dispose of it with household waste.

Package contents

The package contains two (2) replacement Xenon bulb modules, ready for installation.
