Description

The **PELI 2324 M6 Lithium** replacement lamp module is designed exclusively for **Peli™ M6 Lithium** flashlights. This module contains a Xenon bulb with a high-intensity collimated beam, ideal for applications requiring a powerful, precise light.

Key features

- Compatibility: only with **Peli™ M6 Lithium** flashlights
- Type: **Xenon replacement lamp module**
- Laser beam: **high-intensity, high-definition collimated light Haz**
- Easy replacement thanks to screw-in system
- Designed to operate on 2 CR123 lithium batteries
- Construction: **Made in USA**

Lamp replacement instructions

1. Unscrew the flashlight head.
2. Remove the lamp module by unscrewing the knurled part of the body.
3. Carefully insert the new module until it is firmly seated.
4. Replace the lamp head.
5. Adjust the light beam by turning the head to obtain a clean, even beam.
6. Dispose of the old bulb responsibly.

Additional information

- **Brand** : Peli™
- **Manufacturer reference** : 2324

- **Bar code (EAN):** 0019428034504
- **Production year:** 2004
- **Manufacturing location:** USA

Precautions for use

Before replacing the bulb, wait at least **5 minutes** after switching off the lamp to avoid burns. Glass can be very hot.

Why choose a PELI Xenon bulb?

Peli™ Xenon bulbs offer an **exceptionally intense beam of light**, ideal for professionals requiring optimum visibility in dark or extreme environments. Their **American manufacturing quality** guarantees reliability and durability.
