

6 mm guide line - 50 to 200 m with fluorescent beads

Professional guide line for emergency operations

The **6 mm guide line** is designed to support **rescue operations and progress in smoky or confined environments**. Its robust construction, high visibility and bead marking system make it an indispensable tool for firefighters and civil protection teams.

Visual cues and safe progress

The rope is fitted with **14 mm fluorescent beads** spaced every 2.5 m (3 + 1), making it **easy for** firefighters to **find their bearings and progress** in difficult environments. These tactile and visual markers ensure optimum guidance, even in low-light conditions.

Technical specifications

- Rope diameter: 6 mm - high-strength braided rope
- Available lengths: 50 m, 60 m, 100 m and 200 m
- Mechanical strength: > 600 daN
- Total weight (50 m): 1.05 kg
- Markers: green/yellow/red fluorescent beads every 2.5 m
- Beads diameter: 14 mm - high tactile and visual visibility
- Retroreflective thread integrated into the rope for luminous marking

Packaging options

Depending on the length chosen, the **6 mm guide line** can be supplied with various storage and pay-out solutions:

- [Plastic reel](#) (compact and lightweight)
- [Metal reel](#) (robust and durable)
- **Reel bag** for certain lengths, ideal for fast, mobile use

All these mounting solutions are available as options, depending on your operational requirements.

Recommended applications

Ideal for **search and rescue missions**, the **6 mm guide line** facilitates progress in areas of reduced visibility (smoke, darkness, confined spaces). It is ideal for **firefighters, rescue teams in industrial or underground environments**, and all operations requiring fast, reliable location.

Distribution MMF Protection et Sécurité

This guide line is distributed by **MMF Protection et Sécurité** a specialist in high-performance firefighting equipment. Guaranteed quality, durability and reliability for your critical operations.
