

Oscillating flange 3531 for AKRON monitors

Oscillating flange for monitor AKRON 35310001.

Model 3531 offers a flow rate of up to 5700 L/min with a maximum oscillation amplitude of 165°. It is compatible with the majority of AKRON BRASS brand monitors manuals.

Its unique maintenance-free polymer bearing design, high-quality materials and superior performance make it the ideal choice for a long-term, low-maintenance solution to protect your harsh, hazardous environments:

- Maintenance-free polymer bearing (no ball bearings)
- Fully water-powered (no electrical connections)
- Robust, low-pressure-loss bronze water line
- Hydraulically driven stainless steel impeller for long service life

All AKRON® spare parts and accessories are available from **MMF Protection et Sécurité**. You can rely on our authorized dealers and repair centers!
