

7620 Peli™ tactical torch

Peli™ 7620 LED tactical torch - power, autonomy and ruggedness for professionals

Detailed description

Designed to meet the demands of the most demanding environments, the **Peli 7620 torch** combines luminous power and versatility. With its **1124 lumens** in high mode, it illuminates **up to 243 meters**, while its intermediate settings allow you to optimize runtime as required. In low mode, it can provide over 30 hours of continuous use, guaranteeing reliable illumination during long operations.

Its Type III anodized aluminum body ensures **optimum resistance to shocks** and extreme conditions. **IPX8** certification guarantees total waterproofness, even when submerged, making it suitable for use in damp or hazardous environments. The anti-reflective tempered glass lens offers optimum light transmission and enhanced protection against scratches.

Benefits and highlights

The Peli 7620 stands out for its energy flexibility: it can be powered by standard AA batteries, powerful CR123s or a rechargeable 18650 battery, allowing users to choose the best option according to their needs and availability. This hybridity makes it an indispensable light for field operations. Its four programmable lighting modes, combined with five predefined combinations, enable light output to be adapted to every situation, from a wide beam for short-range searching to a strobe mode for emergency signals.

A permanent battery indicator ensures real-time visibility of the charge level, avoiding any unexpected failure in full operation. Its compact dimensions (17.1 cm long) and low weight (196 g with batteries) make it easy to carry and handle, even when wearing tactical gloves.

Recommended uses

This lamp is designed for security professionals, law enforcement officers, firefighters and maintenance workers. It is also suitable for rescue operations, industrial missions and outdoor activities requiring reliable, powerful lighting. Its robustness and waterproofing make it an invaluable ally for operations at night, in wet zones or in demanding environments.

Compatibility and accessories

The Peli 7620 torch is compatible with a number of accessories from the Peli range, including carrying cases designed for the 7xxx series, 18650 rechargeable batteries, and can be used with mounting clips or tactical brackets to integrate with professional equipment. This compatibility enhances its versatility and integration into different working environments.

FAQ - Frequently asked questions

What is the battery life of the Peli 7620? Approximately 2 hours in maximum mode and over 30 hours in low mode, depending on the type of power supply used.

Is the lamp waterproof? Yes, its IPX8 certification means it can withstand complete immersion, making it a reliable tool even in extreme conditions.

Can it be programmed? Yes, the Peli 7620 has four customizable light modes with five programmable combinations.

Is the battery included? The torch is compatible with 18650 batteries, but these are sold separately. You can also use AA or CR123 batteries.

Terms of delivery and returns

The Peli 7620 torch is shipped promptly from our warehouse in France. Delivery generally takes 2-5 working days with tracking. You have 14 days after receipt to return the product if it is not to your liking, provided it is unused and in its original packaging.
