

White polyester webbing with quick-release system

Strap-Pak - Complete set of immobilization straps for rescue boards

The **Strap-Pak** is a complete set of support straps, developed to **stabilize the patient** on immobilization boards such as the Bak-Pak II or other hardboard models. Its strap system provides excellent pressure distribution and optimal support without respiratory discomfort.

Made from high-strength materials, the Strap-Pak withstands intensive use in difficult conditions: humidity, blood, oils or disinfectants. Its washable design and ease of maintenance make it an indispensable piece of equipment for rescue professionals, hospitals and emergency services.

The kit includes 3 adjustable straps with quick-release buckles, enabling precise adjustment around the torso, legs and shoulders. Thanks to its quick-release fastening system, installation time is considerably reduced, while maintaining perfect stability during patient transport.

Benefits and highlights

The main advantage of the Strap-Pak is its **versatility** and **universal compatibility**. It adapts to the majority of immobilization boards on the market, whether fitted with pins, pins or conventional notches.

Its robust, coated nylon fabric resists tearing and biological contamination. Easy to clean, it retains its strength and flexibility even after repeated disinfection. Reinforced polymer quick-release buckles ensure reliable closure, while allowing immediate removal in an emergency.

The Strap-Pak has been designed to reduce the risk of patient displacement during transport or handling in difficult terrain. Its ergonomic configuration keeps the patient in secure alignment, ideal for cases of spinal or cranial trauma.

Recommended uses

The Strap-Pak kit is designed for :

- Rescue and emergency services (fire department, ambulance, EMS, armed forces).
- Hospitals and trauma departments.
- Mountain and water rescue teams.
- First aid training centers.

Perfectly suited to everyday use, extreme conditions and emergency training.
