Foldable stretcher in length and width 2m28(l)

Foldable rescue stretcher in 4 with orange cover

This folding stretcher is designed to meet the demands of rescue missions. Its high-strength aluminum structure, combined with a waterproof, flame-retardant and anti-cracking textile, guarantees both strength and durability. The fabric used is resistant to harsh conditions, yet easy to clean and maintain.

The integrated balancing system ensures stable weight distribution when transporting over uneven terrain. By folding in four (lengthwise and widthwise), it can be reduced from its full dimensions of 208 × 54.5 × 13.5 cm (unfolded) to a compact 105 × 18 × 10 cm (folded), making it easy to transport and store.

With an empty weight of 4.7 kg, it's light enough to be carried or moved with ease. It comes with an orange carrying bag to protect the stretcher and make handling more comfortable in the field. Its maximum load-bearing capacity is 159 kg, making it suitable for most patients in emergency situations.

Benefits & highlights

This stretcher boasts a number of advantages: its ability to fold on two axes to become compact, a balanced construction for easy transport, a fabric resistant to aggression, and a balancing system for stabilized handling. It also offers excellent portability thanks to its low weight and included protective cover.

What's more, its design meets Class I medical device standards and CE marking, making it suitable for regulated professional use.

Recommended uses

This stretcher is perfectly suited to rescue teams, emergency services, mobile hospital structures, interventions on isolated sites, disaster situations or any context requiring rapid, safe patient transport. It is useful for evacuations in difficult terrain, in urban or rural areas, or in conditions where space is limited.

Compatibility & accessories

The SBRAN08_O stretcher is compatible with accessories such as support straps, head immobilizers, additional supports and reinforced covers. The accompanying orange cover is designed for easy transport and protection from the elements. We recommend the use of straps that comply with medical standards to ensure effective patient support.

FAQ - Frequently asked questions

Is this stretcher medically compliant?
Yes, it is classified as a Class I medical device with CE marking.

What is its load capacity?
It can carry up to 159 kg.

How does it fold?
It folds in 4, depending on length and width, considerably reducing the space required for transport and storage.

How heavy is it?
4.7 kg empty.

What are its unfolded and folded dimensions?
Unfolded dimensions: 208 cm × 54.5 cm × 13.5 cm. Folded dimensions: 105 cm × 18 cm × 10 cm.

Is the fabric fire- and moisture-resistant?
The fabric is fire-retardant, waterproof and anti-cracking, making it suitable for all conditions of use.

Terms of delivery

This stretcher is shipped from the GSH-MED warehouse. Estimated delivery time in mainland France is 2 to 5 working days, depending on stock availability. In case of stock shortage, an additional delay will be communicated to the customer.

Why choose this 4-fold stretcher?

The **208×54.5 cm 4-fold stretcher** is a reliable, modular solution for emergency medical missions. With its multi-dimensional folding capability, sturdy, lightweight structure, high load capacity and professional materials, it meets the demands of real-life interventions. By choosing this model, you're opting for professional equipment that combines practicality, performance and safety.
