

Red Epoxy wrench - Professional fire tool

Red Epoxy Tricoise Wrench - robust tool for fire connections

Made from locked aluminum and coated with a red epoxy paint, this tricoise wrench is sturdy and lightweight. It allows easy tightening and loosening of half-fittings of any size, depending on the model chosen. The red color provides excellent visibility in low-light or emergency conditions.

The ergonomic design of the handle ensures optimum comfort when handling, even with thick gloves. The key is also corrosion and impact resistant, guaranteeing long life even in outdoor or damp environments.

Benefits & highlights

The Red Epoxy Tricoise wrench stands out for its strength, lightness and versatility. Its red epoxy coating protects the tool from wear and corrosion, while offering excellent visibility in the field. Its ergonomic shape and secure latch ensure fast, safe handling when working.

Recommended uses

This wrench is particularly suited to firefighters, fire safety services and maintenance technicians. It is used, for example, to open and close DN 50 to 100 fittings on water networks, dry columns, hydrants or technical installations, in normal or emergency conditions.

FAQ - Frequently asked questions

What material is the wrench made of?

Aluminum coated with anti-corrosion red epoxy paint.

For which fitting diameters is it suitable?

For fittings DN 20 to 40

For fittings DN 40 to 60

For fittings DN 50 to 100

For fittings DN 80 to 100

Can it be used with protective gloves?

Yes, the ergonomic shape allows safe handling with thick gloves.

Is it weatherproof and corrosion-resistant?

Yes, the epoxy coating protects the aluminum and extends the tool's life.
