

copie de Clé Tricoise DN 50-100 Epoxy Rouge - Professional fire tool DN 50 A 100

Tricoise Wrench DN 50-100 Epoxy Red - robust tool for fire connections

Manufactured from locked aluminum and finished with a red epoxy paint, this robust, lightweight tricoise wrench is ideal for tightening and loosening half-fittings. It makes it easy to tighten and loosen large half-fittings (DN 50 to 100) without the risk of slipping. The red color provides excellent visibility in low-light or emergency conditions.

The ergonomic design of the handle ensures optimum comfort when handling, even with thick gloves. The key is also corrosion and impact resistant, guaranteeing long life even in outdoor or damp environments.

Benefits & highlights

The Clé Tricoise DN 50-100 Epoxy Rouge stands out for its strength, lightness and versatility. Its red epoxy coating protects the tool from wear and corrosion, while offering excellent visibility in the field. Its ergonomic shape and secure latch ensure fast, safe handling when working.

Recommended uses

This wrench is particularly suited to firefighters, fire safety services and maintenance technicians. It is used to open and close DN 50 to 100 fittings on water networks, dry columns, hydrants or technical installations, in normal or emergency conditions.

Compatibility & built-in functions

Compatible with all standard DN 50 to 100 fittings, this wrench can be easily integrated into fire-fighting systems and municipal or industrial water networks. It is designed for use in demanding conditions, with gloves and safety equipment.

FAQ - Frequently asked questions

What material is the wrench made of?

Aluminum coated with anti-corrosion red epoxy paint.

For which fitting diameters is it suitable?

For DN 50 to 100 fittings.

Can it be used with protective gloves?

Yes, the ergonomic shape allows safe handling with thick gloves.

Is it weatherproof and corrosion-resistant?

Yes, the epoxy coating protects the aluminum and extends the tool's life.

Terms of delivery

The product will be shipped from our warehouse with tracking. In metropolitan France, delivery time is estimated between 2 and 5 working days, depending on availability.

Why choose the Red Epoxy Wrench DN 50-100?

The Red Epoxy Wrench DN 80-100 is an indispensable tool for work on large fittings. Its lightweight aluminum, red epoxy finish and ergonomic design make it a reliable, durable and easy-to-use tool for firefighters and technicians in the field.
