

Mobile Beaconing and Signalling Unit - 4 posts and bases and 4 Skipper ribbons

A complete beaconnng cart for operations and maintenance

Designed for **intervention teams, fire departments, technical and maintenance departments**, this cart makes it easy to transport and quickly set up beaconnng equipment. Compact and robust, it secures hazardous areas, traffic lanes, construction sites or accident perimeters in a matter of seconds.

Equipment included in the cart

- **4 SKIPPER retractable warning tapes** - high-visibility retractable tapes (9 meters each)
- **4 SKIPPER posts** - lightweight, modular and easy to install
- **4 SKIPPER bases** - stable, non-slip and all-terrain compatible
- Ergonomic transport tray - 52 × 65 cm
- Total height: 103 cm, with manoeuvring handle
- Fixed rear wheels + Ø10 cm swivel front wheels
- Empty weight: approx. 22.5 kg
- Finish: black paint and high-visibility yellow retro-reflective stripes

What is the SKIPPER system?

The **SKIPPER system** is a modular signage solution used in industry, road safety and maintenance. It consists of rollable signage tapes mounted on posts or wall brackets, enabling perimeter demarcation in seconds without permanent installation. Each SKIPPER tape is **self-retracting** and locks onto the opposite post or wall, guaranteeing **quick, clean and knot-free installation**.

SKIPPER system benefits

- Ultra-fast deployment and automatic ribbon recovery
- Optimum visibility thanks to high-intensity two-tone ribbons
- Reduced risk of accidents in the work area
- Modular, interchangeable elements to suit site configuration
- Suitable for indoor and outdoor use
- Long service life, UV- and impact-resistant materials

SKIPPER lighting cart applications

Ideal for :

- **fire** and emergency services (accident zones, perimeter security) ;
- **maintenance and public works teams**
- **industrial sites, warehouses and construction sites;**
- **airports, parking lots or restricted areas.**

Advantages of the beaconing and maintenance cart

- Total mobility: rapid deployment and stowage
- Robust, stable structure, even on uneven ground
- Enhanced visibility thanks to SKIPPER signage and reflective strips
- Time savings and enhanced safety for all operations
