200 L solvent cabinet - 3 adjustable shelves

The**200-liter solvent cabinet** is designed for the safe storage of flammable liquids used in professional environments such as laboratories, industrial workshops, maintenance areas or paint shops.

Its sturdy **steel** construction **with beige RAL 1013 epoxy paint** guarantees excellent resistance over time, protecting stored products while enhancing the safety of users and installations.

A safe solution for storing flammable products

The storage of solvents and flammable liquids requires appropriate equipment to limit the risks associated with fumes, accidental leaks and fire outbreaks.

This **safety cabinet for solvents** features an **integrated retention tank with drain plug**, providing a retention capacity equivalent to 100% of the volume stored, in compliance with the French decree of 02/02/1998.

The sloping roof prevents objects from being deposited or stored on the upper part of the cabinet, ensuring that it is used in accordance with good safety practice.

Technical specifications of the 200-liter solvent cabinet

- **Storage capacity:** 200 liters
- **Construction:** steel
- **Finish:** beige epoxy paint RAL 1013
- **External dimensions:** 1800 x 1000 x 400 mm (H x W x D)
- **Interior dimensions:** 1000 x 910 x 370 mm (H x W x D)
- **Interior fittings:** 3 height-adjustable shelves
- **Ventilation:** top and bottom vents with flame-retardant screens

- **Closure:** self-closing spring-loaded doors
- **Drip tray:** with drain plug
- **Weight:** 100 kg

Available with or without sprinkler system CO?

The 200 L solvent cabinet is offered by MMF in two configurations to suit the needs of each installation:

- **Standard version:** storage cabinet without integrated extinguishing system
- **Version with CO? automatic extinguishing system:** system fixed under the cabinet roof with thermal detector and CO? cartridge

The automatic extinguishing device provides additional safety in the event of an abnormal rise in temperature inside the cabinet.

Professional applications

The**200-liter flammable solvent storage cabinet** is suitable for sectors requiring safe management of hazardous products:

- Industries and production sites
- Laboratories and research centers
- Paint and surface treatment workshops
- Maintenance departments and technical workshops
- Establishments handling flammable liquids

MMF: solutions for the safe storage of sensitive products

MMF selects professional equipment designed to improve the safety of users and infrastructures. This range of**solvent cabinets** meets the needs of companies looking for a reliable solution to organize and secure the storage of their flammable liquids.
