

200 L solvent cabinet - Model AMS 200 - 3 adjustable shelves

Complete description of AMS 200 solvent cabinet

Safety cabinet for flammable liquids

The AMS 200 cabinet is designed for the **safe storage of solvents and flammable products**. Designed in steel, it meets the safety requirements of laboratories, paint shops, industries and technical areas. Its reliability makes it an essential piece of equipment for limiting fire risks and guaranteeing a safe work area.

Regulation-compliant 200 L drip tray

The AMS 200 is equipped with a **200-liter drip tray** with drain plug. This sump complies with the **French decree of 02/02/1998**, which requires a retention capacity equal to 100% of the total capacity of the products stored. This feature ensures totally safe storage of liquids in the event of leakage or overflow.

Certificate of conformity

The AMS 200 cabinet is delivered with a **certificate of conformity n° PN 98 5389-1**, attesting to its compliance with the **CNPP FSE 98-006** draft specification. This certification assures professionals of a reliable product, tested and recognized for its safety.

Automatic door closure

The cabinet doors are equipped with an **automatic spring closing system**. This device reduces the risk of exposure to flammable products, and guarantees systematic closing in the event of negligence or emergency.

Adjustable shelves and high storage capacity

The cabinet features **3 height-adjustable shelves**, allowing perfect adaptation to the size of containers: flasks, cans, bottles, paint pots, etc. Its total height of **1800 mm** and width of **1000 mm** provide ample interior storage space.

Vents with flame-retardant screens

The cabinet features two vents (top and bottom), each fitted with a **flame-retardant screen**, for safe air circulation and to limit internal overpressure.

Anti-storage sloping roof

The **sloping roof** prevents objects from being deposited on top of the cabinet, eliminating an additional fire safety risk.

AMS 200 technical specifications

- **Model:** AMS 200 (with or without CO2 extinguishing system)
- **Capacity:** 200 liters
- **Exterior dimensions:** 1800 × 1000 × 400 mm
- **Interior dimensions:** 1160 × 930 × 375 mm
- **Weight:** 100 kg
- **Material:** steel
- **Retention bin:** 200 L with drain plug
- **Color:** Beige RAL 1013 (epoxy)
- **Interior fittings:** 3 adjustable shelves
- **Closing:** automatic by spring
- **Vents:** 1 low + 1 high with flame-retardant screen
- **Roof:** anti-storage slope
- **Certificate:** PN 98 5389-1 - CNPP FSE 98-006 compliant

Advantages of the AMS 200 solvent cabinet

Safe, compliant storage

The AMS 200 fully complies with legal and technical requirements for the storage of solvents and flammable liquids, ensuring maximum protection for people and property.

Robust, durable construction

Its steel frame, reinforced shelves and epoxy finish guarantee a long service life, even under intensive use.

Optimum use in professional environments

Designed for laboratories, paint shops, industries, maintenance areas or storage areas, the AMS 200 cabinet offers a flexible layout and a high level of safety.

Why choose the AMS 200 solvent cabinet?

The **200 L AMS 200 solvent cabinet** is a reliable choice for all professionals handling or storing flammable liquids. Its **200 L compliant retention tank**, **self-closing doors** and **3 adjustable shelves** make it a robust, safe model, perfectly suited to industrial and technical environments.
