

Tripod for Peli™ RALS 9430C floodlight

Why choose the Peli 9430TP tripod?

Developed to meet the requirements of professionals, the Peli 9430TP tripod guarantees reliable, secure support for your lighting fixture. It is particularly suited to technical interventions, construction sites, maintenance operations or emergency situations requiring powerful, well-directed lighting.

Compatibility with Peli 9430 Remote Area Light

The Peli 9430TP tripod is specifically designed for use with the *Peli 9430 Remote Area Light*. This compatibility ensures rapid installation and optimum equipment retention.

The tripod allows the 9430's lighting head to be offset using a 3 m extension cord (sold separately)

Technical features of the Peli 9430TP tripod

- Perfect compatibility with the Peli™ 9430 lighting system
- Adjustable height for precise positioning of light source
- Robust structure suitable for intensive professional use
- Excellent stability on different types of surface
- Quick and easy on-site installation

The advantages of a tripod for professional lighting

Using a lighting tripod like the Peli 9430TP significantly improves the efficiency of field operations.

Stability and safety

Thanks to its sturdy design, the tripod keeps the fixture in a stable position, reducing the risk of it falling or moving unintentionally, even in difficult conditions.

Optimum orientation and coverage

The tripod's adjustable height enables the light to be precisely directed for even, effective illumination of large areas or specific points.

Suitable for professional use

The Peli 9430TP tripod is particularly appreciated by professionals in industry, public works, maintenance, emergency services and events.

Conclusion

The **Peli 9430TP tripod** is an essential accessory for fully exploiting the performance of the *Peli™ 9430 Remote Area Light*. Its robustness, compatibility and ease of use make it a reliable solution for all professional lighting needs in hard-to-reach areas.
