

Peli™ 2720 Heads Up headlamp

Peli™ 2720 headlamp: hands-free lighting for professionals in action

The [™ 2720 headlamp](#) offers high lighting power of up to 259 lumens. Enjoy high-performance, safe lighting with [Peli Products™](#) lighting solutions, renowned for their quality and innovation in the professional sector.

These offer advanced features for professionals and demanding users. With its motion-activated control, red LED night light and hands-free design, it provides optimal lighting in a variety of conditions. Designed for harsh environments, this lamp is ideal for users with gloved, wet or oily hands. Its motion-control technology enables the lamp to be switched on with a simple gesture of the hand, simplifying use while guaranteeing maximum efficiency in work or leisure situations.

Features :

- **Motion activation control:** The lamp lights up instantly with a simple movement of the hand, making use convenient even when wearing gloves or in difficult conditions (wet or oily hands).
- **Variable light output:** Adjust brightness from 100% to 10%, enabling you to tailor light intensity to the specific needs of each situation.
- **Dual red LED night vision:** Illuminate without disturbing your night vision, thanks to dim red lighting that preserves visual acuity at night, particularly useful for night applications or in dark environments.
- **Red flashing beacon (S.O.S.):** In an emergency, the Peli 2720 can be used as a signaling beacon thanks to its flashing mode, allowing you to signal your position effectively.
- **Optical magnification x4:** The x4 optical magnification allows a wide light beam for broad coverage or a penetrating beam for longer distances, depending on your needs.
- **Light output:** 200 lumen output ensures adequate brightness for a variety of applications, while providing sufficient illumination for dark environments.
- **Peli-resistant design:** The lamp is designed according to Peli's resistance criteria, ensuring optimum durability in extreme conditions (shocks, impacts, extreme temperatures).
- **Hands-free design:** The hands-free function keeps your hands free for other tasks, a major asset for professionals in the workplace.

Advantages of the Peli™ 2720 headlamp:

- **Ease of use:** Thanks to motion control, turning the lamp on and off becomes child's play, even in situations

where using your hands is complicated (gloves, wet hands, etc.).

- **Adaptability:** Variable light output lets you adjust light intensity to the specific needs of the task, offering unrivalled versatility.
- **Night vision preservation:** Low-level red light preserves your night vision, which is essential for activities requiring good vision in the dark (e.g. navigation, camping or rescue missions).
- **Increased safety:** The S.O.S. flashing mode increases your visibility in an emergency and signals your presence, an essential addition for field workers or explorers.
- **Proven robustness:** In line with Peli standards, the lamp is designed to withstand the toughest working conditions, offering exceptional longevity and reliability in the most demanding environments.

Use:

- **Professional use:** Whether you're in the security, emergency response, industrial maintenance or rescue services sectors, this lamp meets all your lighting needs in extreme conditions.
- **Night-time and outdoor activities:** Its red light and hard-wearing design make it an ideal choice for hikers, campers or anyone involved in outdoor activities at night, preserving night vision and providing targeted illumination.
- **Harsh working environments:** With a design that allows it to be used in wet, oily or dusty environments, the Peli 2720 is a must-have for workers in tough conditions (e.g. workshops, factories, maintenance).

The Peli 2720 combines advanced technology, practicality and robustness, offering a reliable lighting solution for professionals and nature lovers alike. Its night lighting, motion control, signaling and optical magnification features make it a must-have for anyone who needs light in low-visibility situations. Its rugged Peli design ensures optimum durability, even in the most extreme conditions. Choose the Peli 2720 for a lamp that will accompany you in all your challenges, day and night.
