

## 3 m extension for RALS 9430, 9460 and 9470 B/C floodlights - PELI 9437B

The **3 m PELI 9437B extension cable** is designed for **RALS 9430, 9460 and 9470** floodlights in **B and C versions**. It allows the link to be extended to adapt the **mobile lighting** installation to the constraints of the site, and to optimize spotlight positioning.

This solution facilitates the installation of Peli RALS floodlights on site, in industrial environments or for any type of intervention such as law enforcement or emergency services, while guaranteeing a stable connection that complies with manufacturer specifications.

### Technical specifications

- **Length:** 3 meters
- **Compatibility:** RALS 9430 / 9460 / 9470 (versions **B and C**)
- **Connector:** black, manufacturer-compliant
- **Reference:** **PELI 9437B**
- **Type:** extension for **professional lighting** systems

These features ensure easy integration and reliable electrical compatibility with the models concerned.

### Is this extension compatible with all RALS spotlights?

No. It is dedicated to models **9430, 9460 and 9470** in **B and C versions**. For other generations, please check the model number.

### Operational benefits

In the construction, industrial or emergency services sectors, the configuration of portable lighting must remain adaptable. This extension allows :

- Greater positioning flexibility
- Secure continuity of power supply
- Installation in compliance with manufacturer's requirements

An original PELI accessory, part no. **9437B** is a reliable complement to optimize the installation of your RALS floodlights in professional environments.
