Waterproof carrying case Peli 0500

A large-format PELI waterproof case for professionals

The **black PELI 0500 waterproof case** is a transport solution designed for professionals who need to protect sensitive, bulky or valuable equipment. Designed to withstand harsh environments, this PELI **protective case** offers an excellent level of security for the transport, handling and storage of technical equipment.

Thanks to its robust design, this **large professional waterproof case** meets the needs of the industrial, audiovisual, technical, events and logistics sectors. It's the right choice for anyone looking for a reliable, durable, **hard-shell case** for intensive use.

Reliable protection for sensitive equipment

In keeping with the quality standards of the PELI™ brand, this **watertight transport case** has been designed to protect its contents effectively against external aggression. It is particularly suitable for transporting fragile equipment, electronics, special tools or professional devices requiring extra protection.

Its generous size can accommodate bulky equipment while retaining all the advantages of a **watertight PELI case**: strength, reliability and adaptability. It's the ideal solution for companies wishing to secure their equipment during travel, on-site interventions or storage phases.

Foam or foamless version: a case to suit your needs

The **black PELI 0500** is available in two configurations to suit different business needs. The **foam** version is particularly suitable when equipment needs to be held and protected precisely inside the case. The **foam-free** version, on the other hand, allows greater freedom of layout to integrate specific cushioning, custom compartments or make full use of the interior volume.

This flexibility of use makes the **PELI 0500 waterproof case** a relevant solution for a wide range of professions, whether for technical transport, protection of professional equipment or logistics organization.

A protective case designed for field use

Solid, functional and built to last, this **professional transport case** is a continuation of the PELI™ range,

renowned for its reliability in the field. It is ideal for users looking for a **large, black, waterproof case** capable of effectively protecting their equipment in demanding professional environments.

Whether transporting industrial equipment, measuring equipment, audiovisual devices or technical accessories, the **PELI 0500** offers a reliable, durable response to everyday protection needs.

Does the Peli 0500 make it easier to transport bulky equipment?

Yes, the **Peli 0500 waterproof carrying case** is designed for **transporting bulky, sensitive equipment** in demanding environments. As an option, it can be fitted with **reinforced castors** to facilitate movement, particularly on industrial surfaces or outdoors.

This option improves**handling ergonomics** by limiting the effort required to transport heavy loads, while ensuring good stability. Combined with its **sturdy structure** and **carrying handles**, the Peli 0500 is a **reliable and durable solution** for moving equipment in complete safety.

Should I choose the foam or non-foam version?

The version **with foam** is ideal for wedging and securing equipment precisely. The **foam-free** version, on the other hand, is more suitable for professionals wishing to fit out the interior of the case themselves, or to have completely free storage space.
