# Waterproof carrying case Peli 0350

The **PELI 0350 waterproof case** is designed for professionals looking for a reliable, robust **PELI protective case** suitable for transporting sensitive or bulky equipment. Its cube format makes it a particularly interesting solution for equipment requiring more homogeneous storage space, while retaining the strength standards of the **Protector** range.

This **rigid, watertight case** is ideal for transporting technical equipment, audiovisual equipment, measuring devices, special tools and professional accessories requiring extra protection. For a company, a technical department or a field user, the **PELI 0350** is a durable and reassuring daily transport solution.

## A professional carrying case designed for demanding environments

Like the other models in the **PELI Protector** range, the **PELI 0350 waterproof case** is designed to effectively protect its contents against water, shock and dust. It also incorporates the features for which PELI cases are renowned: an **automatic purge valve**, an **O-ring seal**, **overmolded rubber handles** and a **stainless steel structure**. Together, these features make the PELI **watertight transport case** particularly well-suited to intensive use and demanding professional contexts.

## Several configurations to suit your needs

The **black PELI 0350** is available in several configurations to suit different uses. The **foam** version provides protective cushioning for fragile equipment. The **foam-free** version is ideal for professionals wishing to make full use of the interior space or create a customized layout. A configuration **with padded dividers** is also available to facilitate organization of contents while maintaining good protection.

This versatility means that the **PELI large-format protective case** is equally suited to transport, storage, logistics and secure storage requirements. It's the perfect solution for a wide range of professions requiring a robust, modular **professional waterproof case**.

## A reliable solution for transporting and protecting equipment

With its specific format and proven design, the **PELI 0350** is aimed at users looking for a **large professional waterproof case** capable of offering a high level of protection over time. It fits perfectly into a logic of secure

transport of sensitive equipment, intervention preparation or on-site technical organization.

Choosing a **PELI waterproof case** means opting for a solution renowned for its durability, strength and ability to protect equipment effectively in harsh environments. The **PELI 0350 cube case** is fully in line with this logic, and meets the expectations of professionals who don't want to compromise on the protection of their equipment.

## Which configuration should I choose for the PELI 0350?

The **foam** version is recommended for better protection of fragile equipment. The version **without foam** allows free interior layout. The version **with padded dividers** is ideal for users wishing to organize their equipment more easily, while retaining good protection.

## Does the Peli 0350 make it easier to transport bulky equipment?

Yes, the **Peli 0350 waterproof transport case** is specially designed for **transporting bulky, sensitive equipment** in demanding environments. As an option, it can be fitted with **reinforced castors**, making it easier to move large loads, particularly on industrial or outdoor surfaces.

This configuration significantly improves**handling ergonomics** by limiting the effort required to move loads, while maintaining excellent stability. Combined with its **ultra-robust structure** and **carrying handles**, the Peli 0350 is a **reliable solution for the long-term, safe transport of heavy equipment**.
