TEE-UU CRASH ADULT injury simulation kit - 36 realistic scenarios

The **TEE-UU APPLICATION OF INJURY** kit **for CRASH & CARRY** is a complete set of injury simulations designed to enhance fire and rescue training. It enables realistic situations involving adult victims to be reproduced, in order to improve teams' operational readiness.

Comprising 36 laminated elements representing a wide variety of injuries, the kit can be used to create a wide range of training scenarios, from mild traumas to critical situations.

Realistic, immersive simulation

- 36 ready-to-use injury simulations
- Detailed visual representations for optimum realism
- Dedicated element for identification (conscious, unconscious, etc.)
- Suitable for fire and rescue training

Ease of use

- Quick fastening with hook-and-loop fasteners
- Immediate installation on manikin CRASH & CARRY
- Pre-cut elements for precise positioning
- Easy identification thanks to marking on back

Durability for intensive use

- Resistant, watertight laminated supports
- Reusable for multiple training sessions
- High-quality 4-color printing

Professional applications

- Firefighter training
- First-aid training
- Accident and emergency simulations
- Realistic training exercises

Technical specifications

Features	Values
Type	Injury simulation kit
Compatibility	CRASH & CARRY Training Dummy
Number of items	36 items
Max. dimensions	Format up to DIN A4
Total weight	? 1 kg
Thickness	0.125 mm
Material	Waterproof laminate support
Fastening	Hook-and-loop fasteners

Scope of delivery

- 36 injury simulations
- Storage pouch

MMF expertise

Distributed by MMF, this simulation kit complements fire and rescue training equipment for realistic, varied training adapted to the requirements of professionals.
